

Mail Marketing to Business and Consumers

At T2D Group we have over 12 years experience supplying lists to hundreds of well known companies. DIY Superstores, Charities, Car & Van manufactures state rail companies and so on.

We source both consumer and business lists from 500 to 5 million records. These are only supplied from leading list owners who invest in keeping their files updated.

We will also give advice on the best list for your business. It may not be the first one you think of! We can also help you with getting your mail marketing campaign started.

Data Processing

De Duplication

Processing of one file of the combining of a number of files to produce a single database free of duplicated contacts or addresses. The level of de duplication can be altered

Address Processing

Process your data against PAF and remove unwanted and embarrassing spelling mistakes, add address elements and verify and correct postcodes. This gives a higher delivery percentage plus greater savings if using mailsort

Purge & Merge

Processing of more than one list onto a single file. Multiple address formats can be processed and the final results de duplicated

Add contact names to data if they are missing. This is available for both business and residential data

Suppressions

We can process data files to remove those on Mailing Preference Service as well as remove those addresses which are known gone-aways, deceased and well as identify those who have moved and supply new addresses. This cuts down on wasted postage and stops mail arriving where the addressee has registered on MPS or where the intended recipient is no longer there.

Mailsort

Dependant upon the mailing size we can process files for all Mailsort and Presstream mailing. This process puts the data in the right order for Royal Mail and produces reports showing bag volumes, destinations etc. Typical savings are 25% off the standard postal tariff

Printing Services

Letter Print

Print A3, 4 and 5 letter text with fully personalised salutations names and addresses. Additional personalisation can also be included. Signatures can be printed in black or other colours. Full proofing is done prior printing. Laser, Inkjet and Litho are available and print can be Simplex or Duplex

Envelope Printing

Envelopes can be standard stock or specials and can be overprinted to any specification. Because of the sheer volume of envelopes used our costs are normally lower than a conventional printer

Letterhead and Insert Print

We can print from your proof letterheads as well as inserts. We have access to letterpress, web press and digital print so any volume can be handled. A full range of papers are available

Mail Fulfilment

Folding

Your Letterhead and insert can be folded down to any size which can result in a saving on the postage. Folding can be done by hand or machine which is dependent upon materials or volume Nesting This allows a series of inserts to be collated in a pre determined order.

Collation

Where more than one item is personalised or items are numbered

Insertion

Items can be inserted into envelopes either by hand or machine. This is dependent upon the volume, number of inserts and the materials.

Others

- Bob and spot glued insertions
- Stickers and Vouchers
- Boxing
- Promotional Wrapping

Mailsort and Presstream

Mail sort and Presstream can be handled and the mailing house will pre-sort the finished mail into suitable bundles and bag this in postcode order before handing to Royal Mail Streamline. This is only available where minimum volumes and data quality criteria are met

Polybagging

A4 and A5 polybagging up to 5mm items. High speed and can seal on one or all four sides
